

MOVING DATA TO DECISIONS GLOBALLY

Working with remote response teams and mission partners is important in cyber but managing workload, data, and decisions across multiple locations is difficult. Hive-IQ[®] is a SaaS and mobile secure workspace where all cyber teams and decision makers can collaborate, integrate, and move data to decisions faster. When security matters, keep the entire team moving at the speed of need.

- 
COLLABORATE
 Arm remote teams with a secure workspace
- 
INTEGRATE
 Integrate each teams' unique 3rd party app
- 
DOMINATE
 Analytics to drive data to decisions faster

SUPERCHARGING CYBER INCIDENT RESPONSE

Hive-IQ is a dual-use platform that helps manage collaboration by improving situational awareness and our ability to see things from each unique perspective. Our customers include the Department of Defense, National Guard, Critical Infrastructure, State and Local Governments, and Private Industry. We help manage response efforts among real humans with real technology. Automate reporting and workflow to create a faster and more secure response. We make managing complexity easy benefiting you, your customers, partners, and all security minded organizations.
