

LIVE & DYNAMIC MALWARE ANALYSIS POWERED BY AI

MATRIX Enterprise uses AI to conduct interactive live and dynamic malware analysis while integrating best of breed intelligence and technology integrations, both on-premise and in the cloud. Cyber security focused organizations can now harness the power of AI to optimize defense against the most advanced cyber security threats.

Deep Malware Analysis

MATRIX Enterprise uses AI to optimize the analysis of files against multiple malware knowledge bases, cross-checking for IOCs, threat actors, behaviors, and more.

Live and Dynamic Malware Analysis

MATRIX Enterprise empowers your deep analysis providing a custom toolchain, offering hundreds of integrated tools. You defend against malware while we manage the sandbox and toolchain.

Integrated Threat Analysis

MATRIX Enterprise facilitates your own analysis of malware structure and behavior while enriching your knowledge with data from across the platform via OSINT sources.

Customizable Workflow

MATRIX Enterprise creates AI-powered workflows around each event, incident, and response saving time and resources every day, every week, and every month.

AI-Assisted Discovery

MATRIX Enterprise uses AI to recommend current, past, and future files, conversations, and partners that are related to your analysis saving you time and resources.

Global Scalability

MATRIX Enterprise plugs you into a global community of malware professionals, so you are never alone in a fight. Get a view of malware trends and distribution on a global scale.
