A NEW BREED OF COLLABORATIVE INTELLIGENCE

Real-time threat sharing between trusted partners creates a more resilient and effective cybersecurity ecosystem. The results create a much deeper understanding of a threat becoming a much harder target for the bad guys. Hive-IQ® is a secure cloud solution where all industries collaborate and supercharge their response. We've partnered with Beyond Identity to give you 100% confidence and make unauthorized access impossible. When security matters, keep the entire team moving at the speed of need.
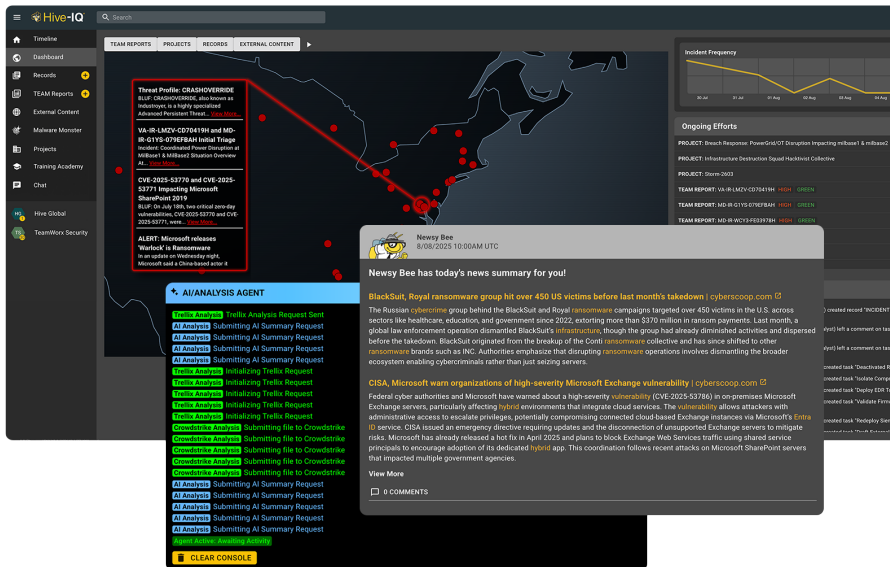

COLLABORATE
Coordinate cyber response across critical industries

INTEGRATE
Integrate CTI, malware, & incident response tools

DOMINATE
AI compares and moves data to decisions faster

DEFENDING THE WORLD'S MOST CRITICAL INDUSTRIES

Hive-IQ® is a dual-use platform that uses AI to capture data and conversations to streamline incident response and cyber hunt efforts by accelerating analysis and enrichment, increasing our ability to see the threats faster. Our customers include the Department of Defense, National Guard, State and Local Governments, Global Critical Infrastructure, and our Allies. Hive-IQ® integrates and automates everything from reporting to response workflow creating a faster and more efficient and secure response. We make managing hundreds of conversations and response efforts easy.
