

Election Security Fundamentals Course

Our fundamental democratic rights are being challenged by malicious cyber actors on a daily basis. Learn how to be part of the solution and defend the American democracy in 2020 Primaries, Debates, Conventions, General elections, and Inauguration. Be ready when YOU are called to serve.

Defend Democracy in 2020

The cyber threat is real and is aiming to undermine our democracy and the American way of life. All Americans need to be part of the solution. We need to defend 178,217 precincts and 231M eligible voters. Take our short course to understand the fundamentals about elections in the U.S. and how you can be part of the solution.

The 4-Hour Audience

National Guard, fusion centers, DHS, Law Enforcement, and partners.

Valuable Elections Key Terrain

Learn the laws, systems, roles, and authorities in running an election.

Threats & Vulnerabilities

Understand malicious actors and the technical aspects of election systems.

Resources & Guides

Learn who your partners, resources, and support are in each State.

Make Sure Everyone's Vote Counts

At TeamWorx Security, we work with US Cyber Command, the Department of Homeland Security, the National Guard, State & Local Governments, and private industry to defend the nation from cyber threats. We understand malicious cyber actors and want to help protect our elections from influence and interference.
