

Supercharge Your Cyber Ecosystem

Hive-IQ[®]

What Does it Do?

Managing multiple teams and their technology is difficult. Hive-IQ[®] automates report management, project workflow, and tasks between your technical and non-technical teams. We help you build a comprehensive view of what the entire cyber team is working on and when. Let your team do what they already like doing, and we'll turn that workflow into actionable, manageable insights.

Compliance Makes Sense

Seamless compliance integration brings the whole team together making it harder for the bad guys.

Endpoint Tool Integrations

Integrate beyond expensive endpoints and create a more secure enterprise situation awareness picture.

Faster Decision Making

Cyber security requires decisions to move at the speed of need reducing gaps in your secure enterprise.

Team Collaboration

Knowledge management, complete mission situational awareness, and smarter collaboration makes sense.

How is *Hive-IQ*[®] Different?

What separates **Hive-IQ**[®] from other platforms is our focus on the decision making ecosystem which can be directly integrated into fighting bad guys. Our easy to use dashboard, easy analytics, and interoperability is continuously updated with the workflow efforts of the entire global team.
