PREPARING ANALYSTS for the CYBER MISSION

We've trained over 800 analysts to date. The Introduction to Threat Analysis Course (ITAC™) prepares the DoD Intelligence analysts and operators to integrate successfully in the cyber mission through a highly structured, collaborative analysis hands-on effort. This hands on course is designed to prepare new and experienced analysts and operators to navigate, communicate, and succeed in a real world technical cyber mission.

ITAC™ is NOW offering remote training from our studio in Maryland.
